Satellite Living	pg. 27	Patrons	pg. 101
Faculty	pg. 43		

*"One day at a time — this is enough.
Do not look back and grieve over the past,
for it is gone.
And do not be troubled about the future, for
it has yet to come.
Live in the present; and make it so beautiful
that it will be worth remembering."*

— Ida Scott Taylor

*"To me every hour
of the light and dark
is a miracle,
every cubic inch of
space is a miracle."*

— Walt Whitman

*"A University is, according
to the usual designation,
an Alma Mater,
not a foundry,
or a mint,
or a treadmill."*

— John H. Newman

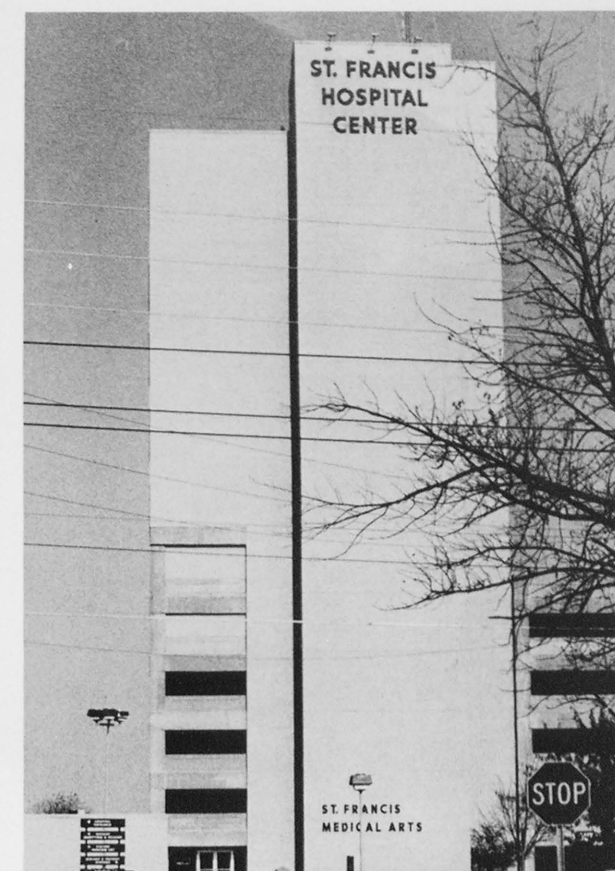

*"The real price
of everything
is the toil
and trouble
of acquiring it."*

— Adam Smith

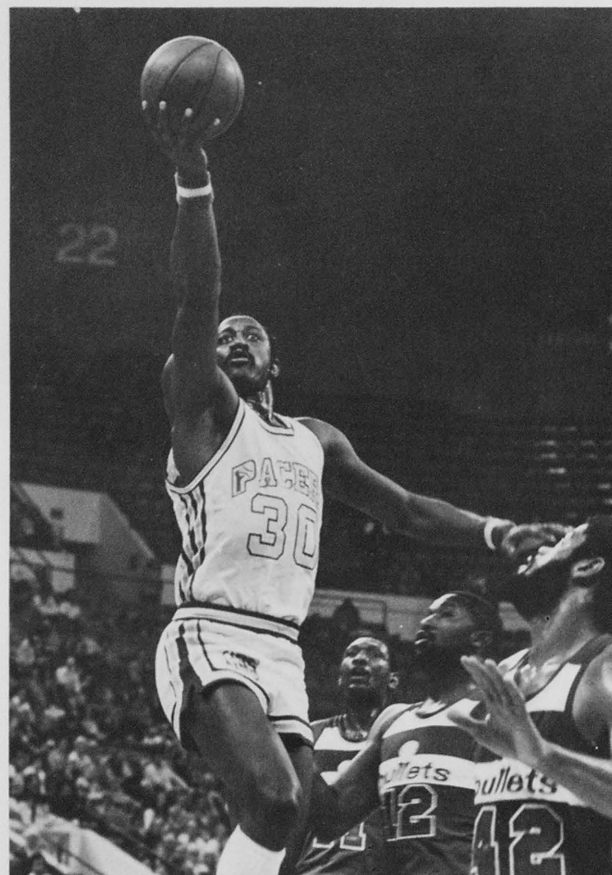

*"To talk in public,
to think in solitude,
to read and to hear,
to inquire and answer
inquiries,
is the business
of a scholar."*

— Samuel Johnson

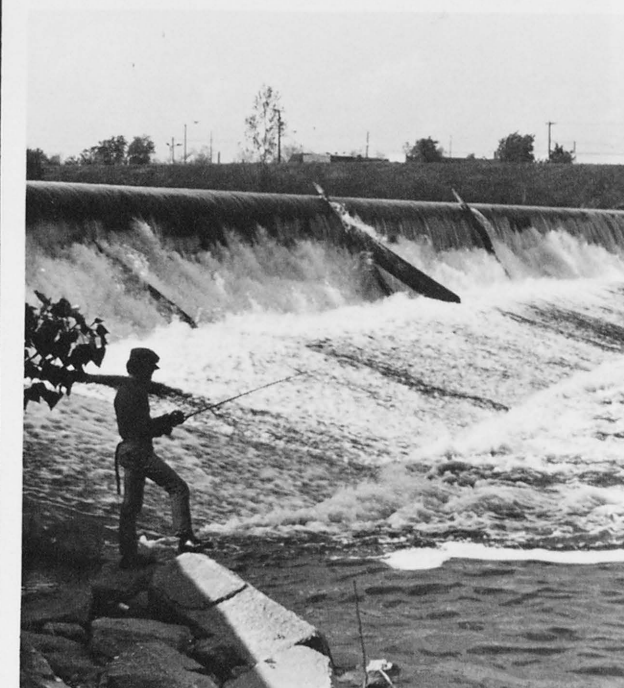

*“Man is the only animal
that laughs
and weeps;
for he is the only
animal that is struck
with the difference
between what things are,
and what they ought to be.”*
— William Hazlitt

*"The best portion
of a good man's life,
his little nameless,
unremembered acts
of kindness
and of love."*

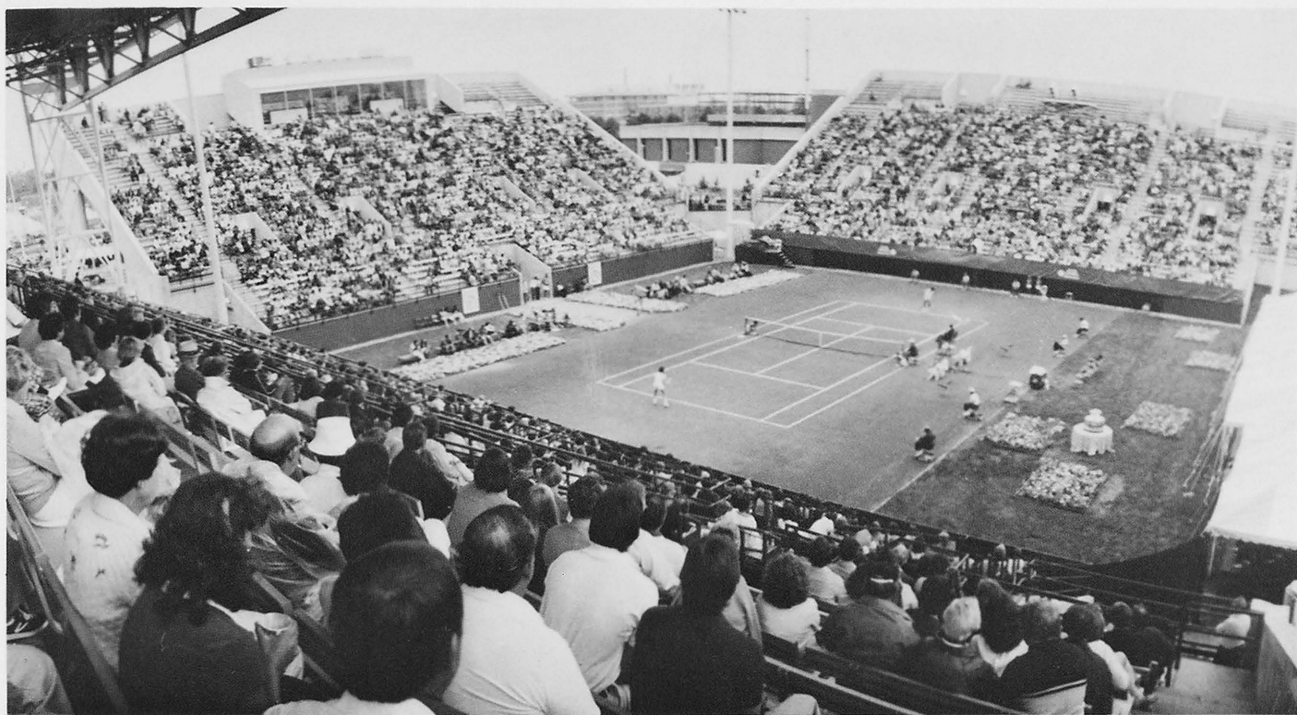

— William Wordsworth

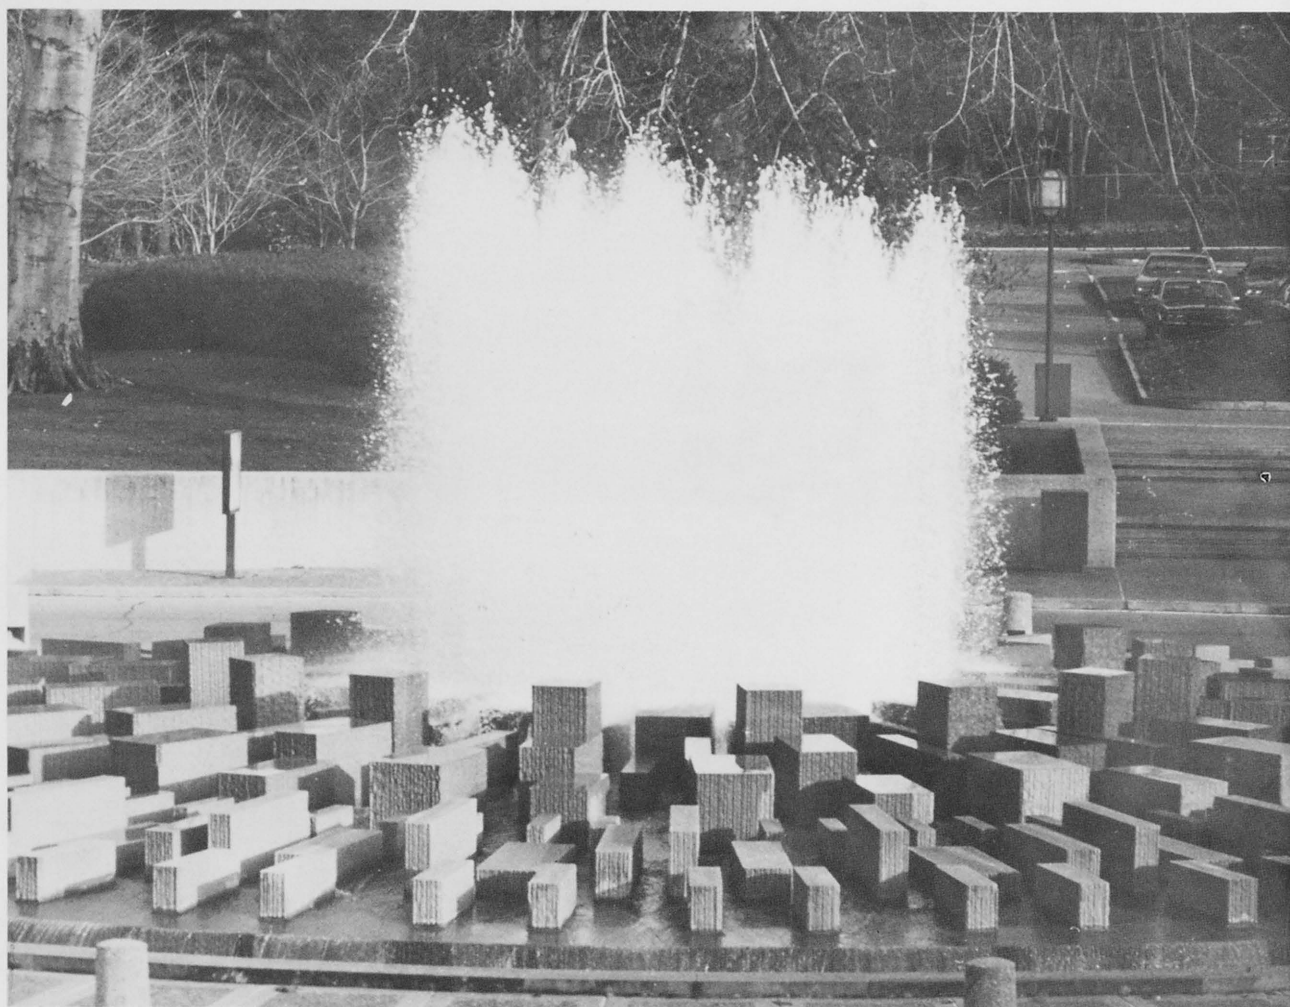

*“All things
come round to him
who will but wait.”*

Henry W. Longfellow

*"Ships that pass in the night,
and speak
each other in passing,
Only a signal shown and a
distant
voice in the darkness;
So on the ocean of life, we
pass and
speak one another;
Only a look and a voice, then
darkness
again and a silence."*

— Henry W. Longfellow

**HOSPITAL &

PARKING**

The Art Of Medicine

Aptitude: For those with a penchant for embarrassing moments — both a flair for creating them and a skill for dissuading them.

Contraindicated: If the female anatomy makes you all “goose pimply”. Especially contraindicated if you think the “vulva” is a great little automobile.

Grand Rounds: A secret conclave from which a belch of white smoke means “we’ll contest the malpractice,” and black smoke means “we’ll settle out of court.”

Call: A time when if a woman yells “Oh God Help Me!”, you answer: “I’m right here, honey.”

OBSTETRICS — GYNECOLOGY

SURGERY

Aptitude: For those who work well with their hands, like sculptors, pianists, and frustrated auto mechanics. Especially suited for those who did all the "crafty" projects in "Highlighter" magazine as children.

Contraindicated: In those with DVT, Hypoglycemia, and migraine headaches. Especially contraindicated in your childhood nickname was "Thumbs" or "Spaz".

Grand Rounds: Rather entertaining. A forum where conjecture, opinion, and heresy beat the scientific method any old day.

Call: Abusive, yet glamorous.

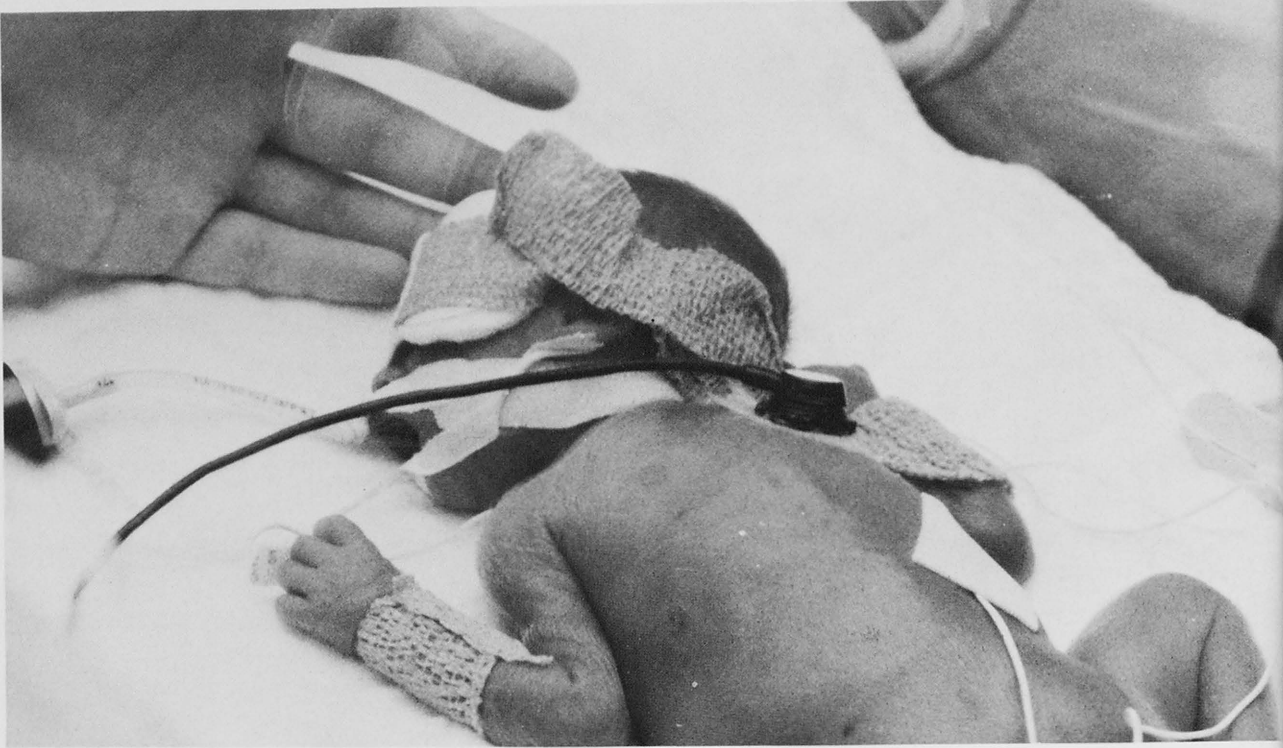

Aptitude: Well suited for those who enjoy miniatures and minutia. Especially for those who view children as "little bundles of Joy".

Contraindicated: In those with immunodeficiency, and with "spastic IV syndrome". Especially contraindicated for those who view children as "little bundles".

Grand Rounds: A forum of staff and residents who share an uncanny knack of smiling inappropriately. A study is in progress to determine if this is an acquired or congenital behavioral defect.

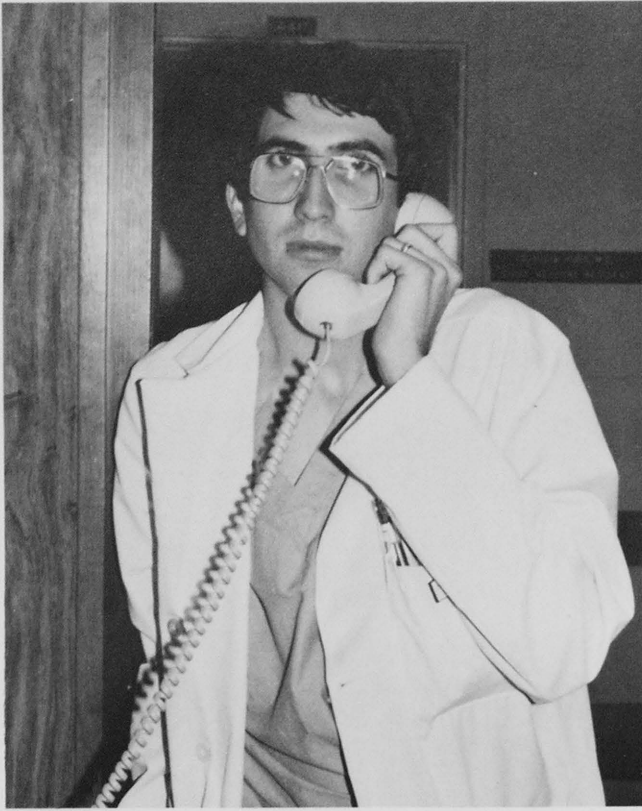

Call: Noble, yet cute.

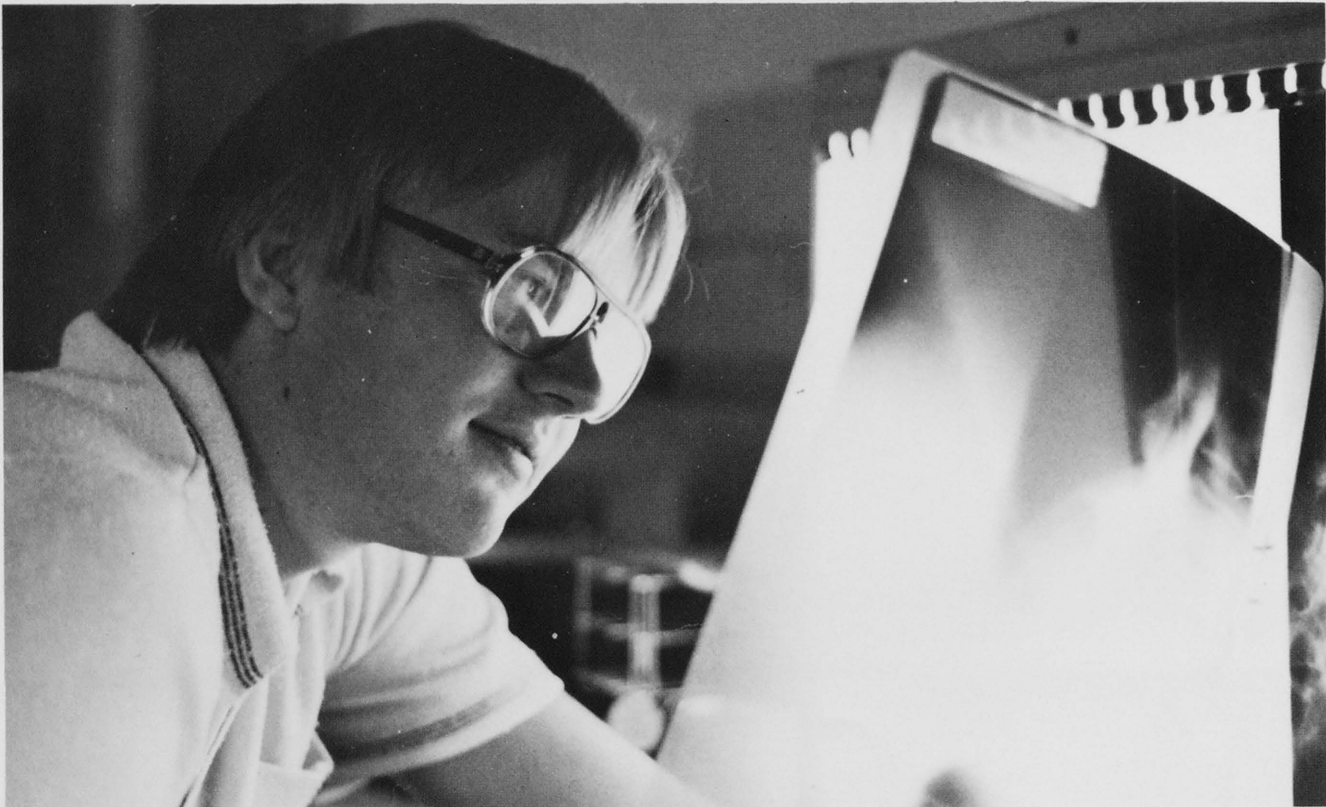

PEDIATRICS

MEDICINE

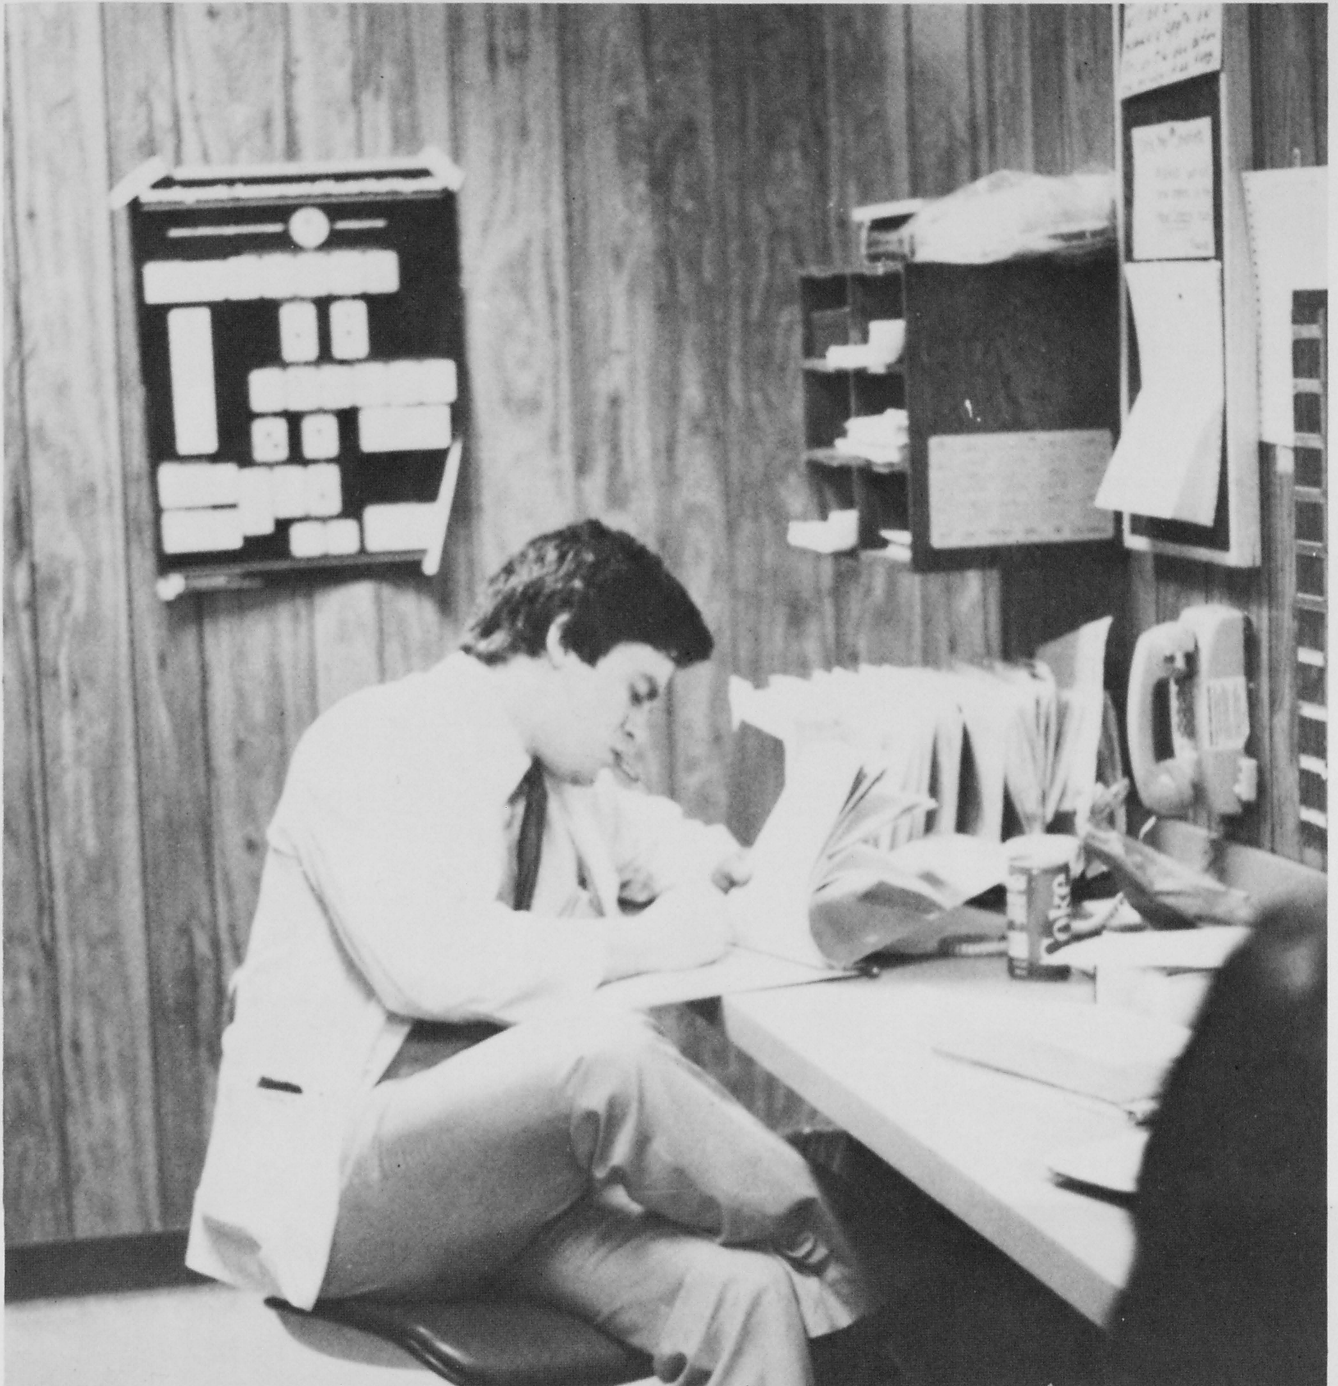

Aptitude: Best suited for those with a strong "Monopoly" background, as they play the "turf, bounce, or code" game to their best advantage.

Contraindicated: In the impatient, and easily frustrated. Especially contraindicated if your problem lists on admission do not enter the double digits.

Grand Rounds: Rather boring — a forum where the scientific method is used to beat such exciting topics as "Q-T Prolongation" to a bloody pulp.

Call: Zany, yet touching.

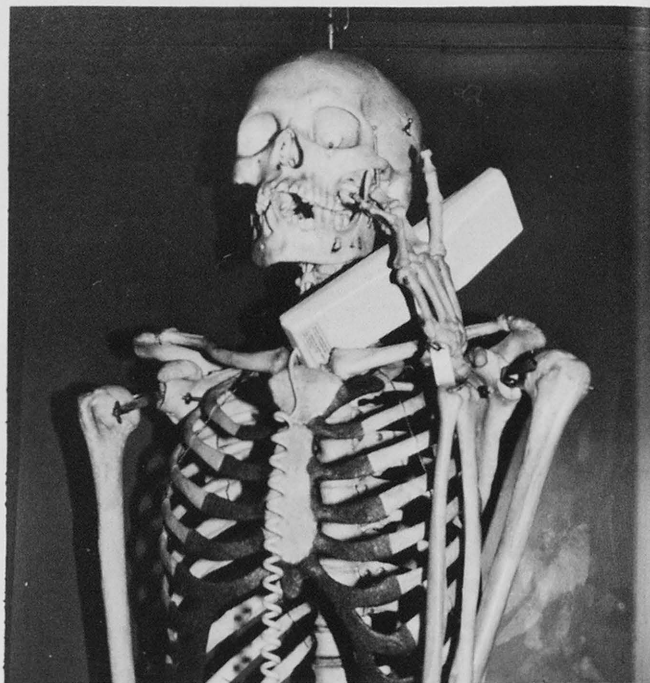

Aptitude: For those who think that Medicine is but a pot of lard, and they are the cream.

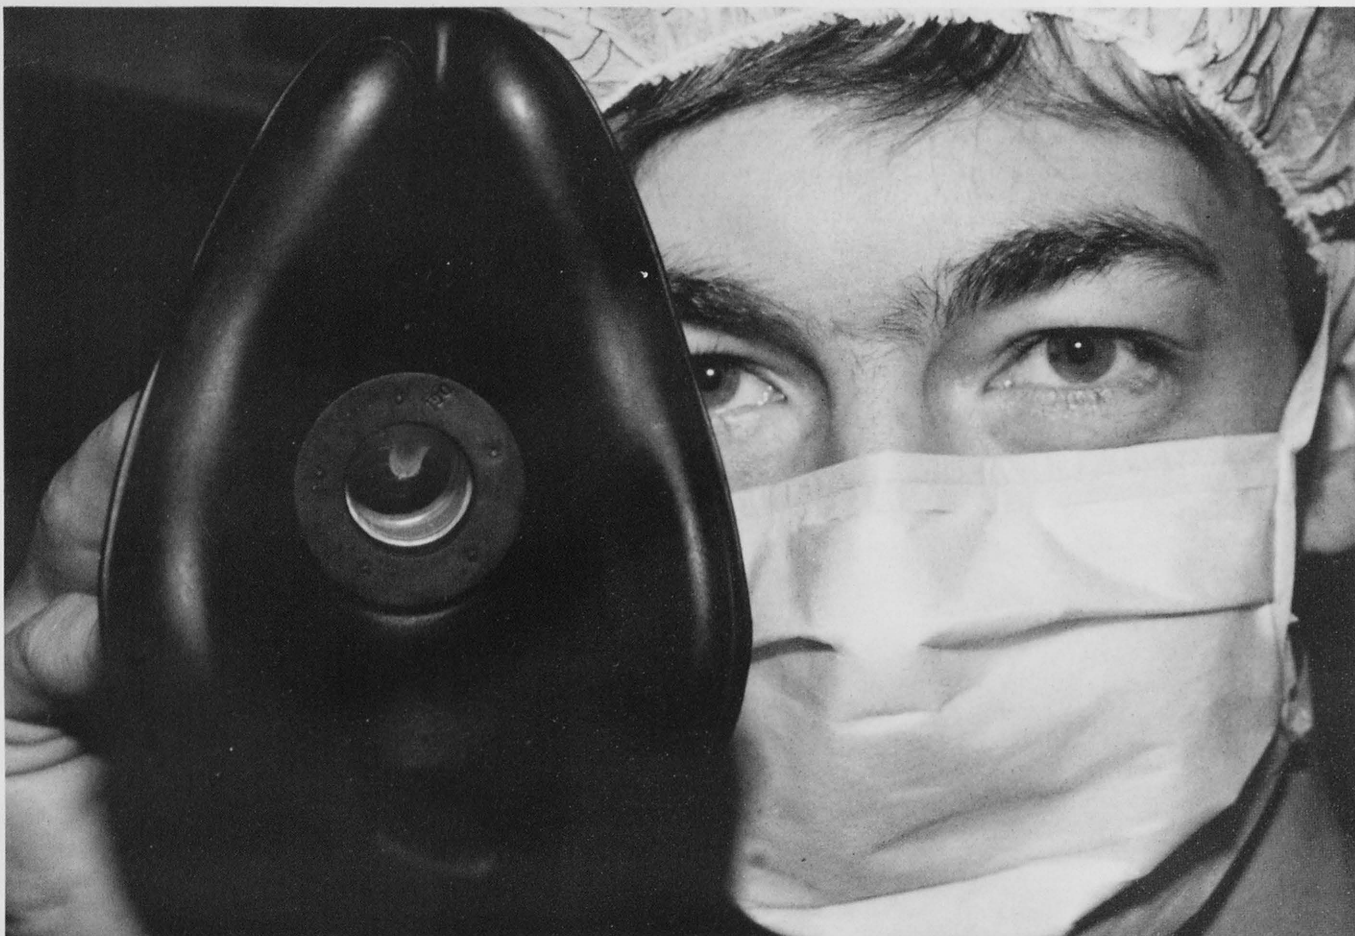

Contraindicated: If over the past four years you've developed a taste for rectal exams and manual disimpactions.

Grand Rounds: Variable — however Journal Club among these specialties remains fairly constant — a thorough review of the Indianapolis Star . . .

Call: What! Call?!

SPECIALTIES

GARY

Another leisure day spent in the privacy of a study deep in the depths of the Gary campus.

The "Freshman Gang" in Gary once again caught hiding from the Indianapolis campus.

Not exactly the front of Med Sci, but the Gary group manage to find a spot away from the factories to take a lunch break.

Rich Lucht, Dave Rheuble, and Randy Roberts studying card games.

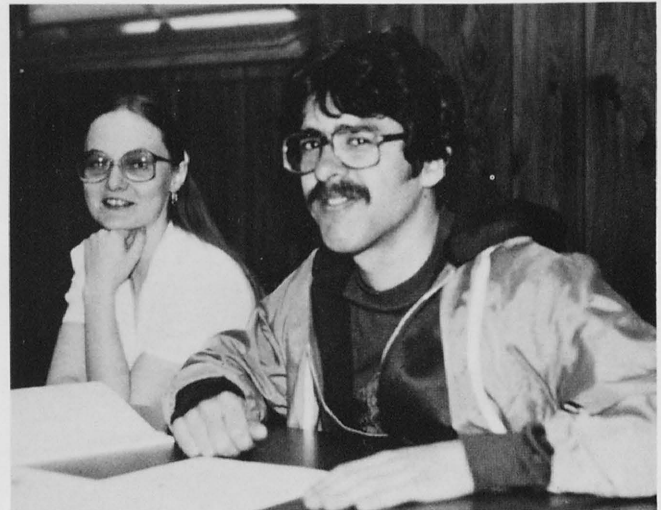

SOUTH BEND

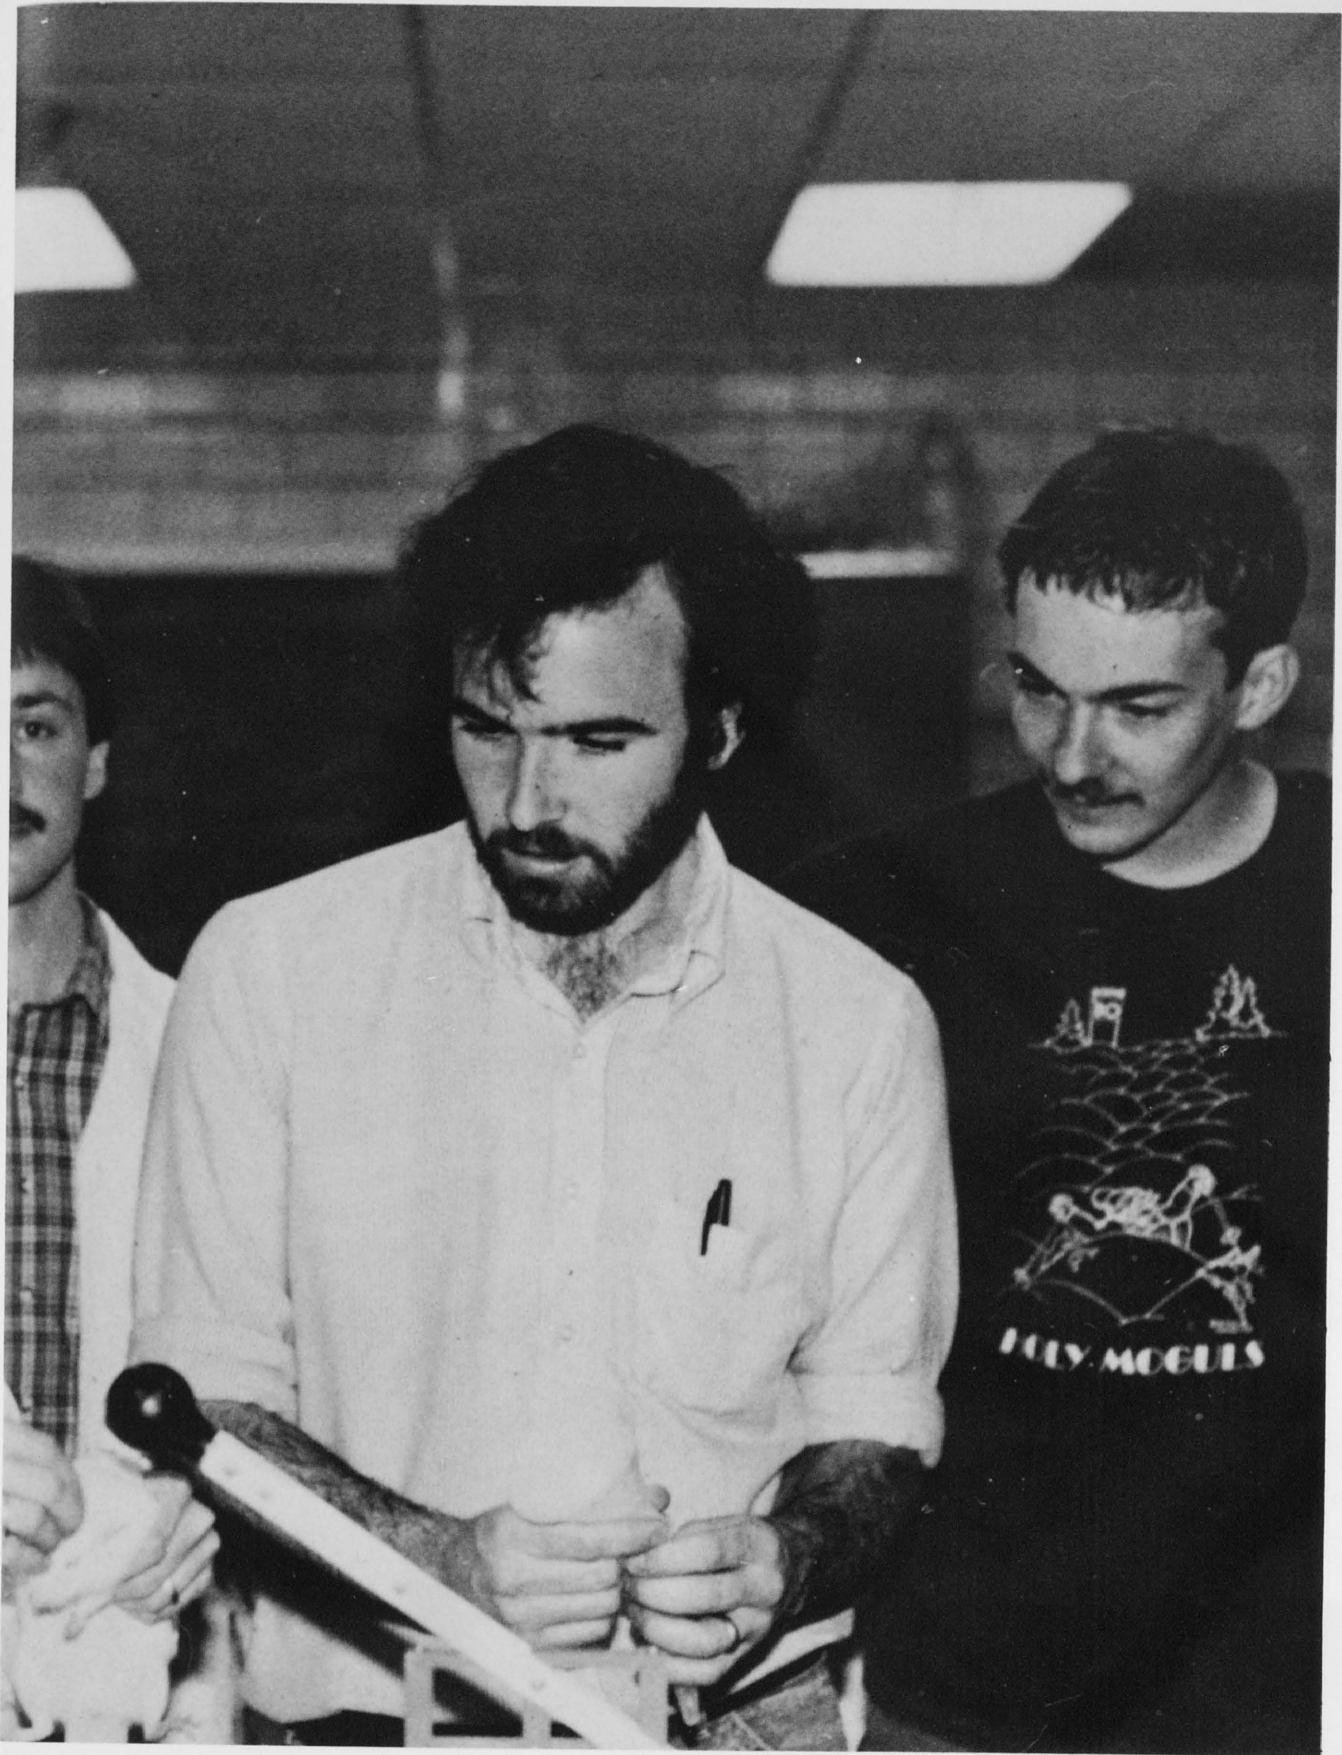

Soo Park once again hard at work dissecting table flies.

Winston Gehrig in the privacy of his study.

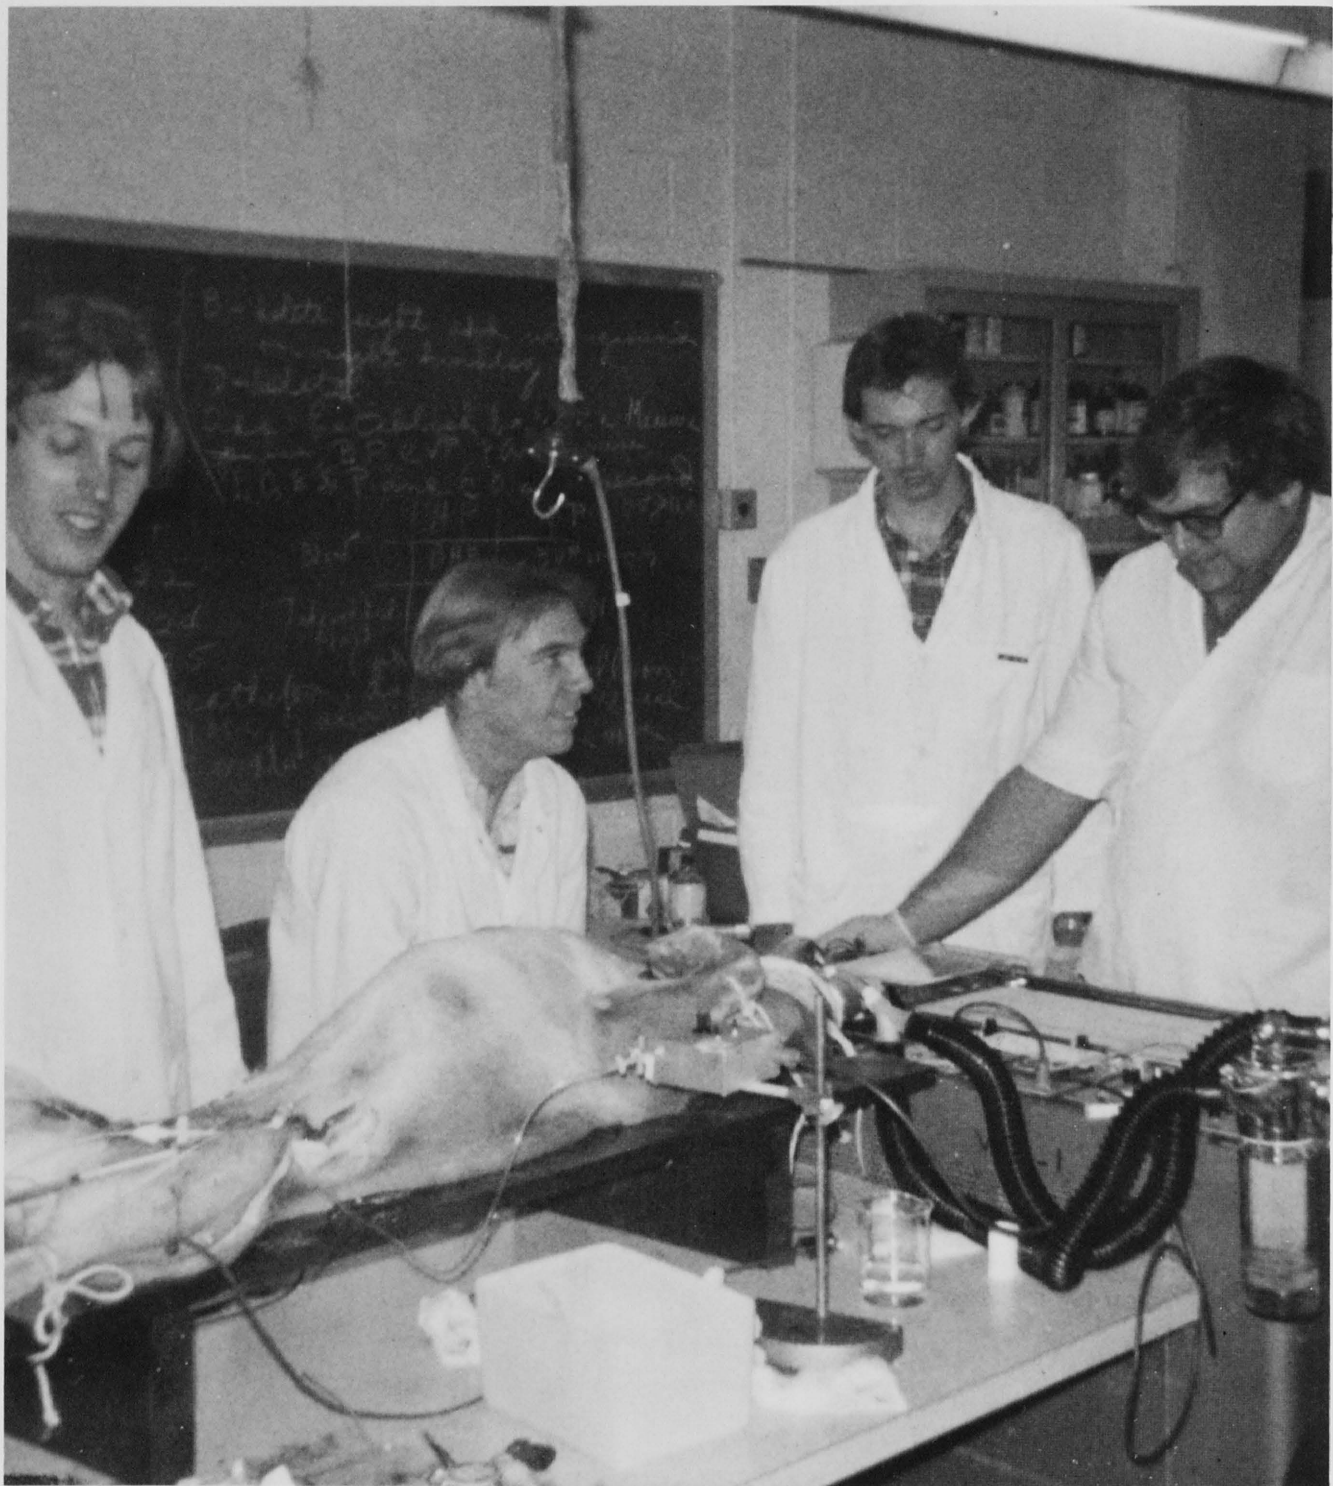

Lana and Randy wondering what the rest of the world is doing while they study for another Anatomy exam.

"Wonder how they do that???"

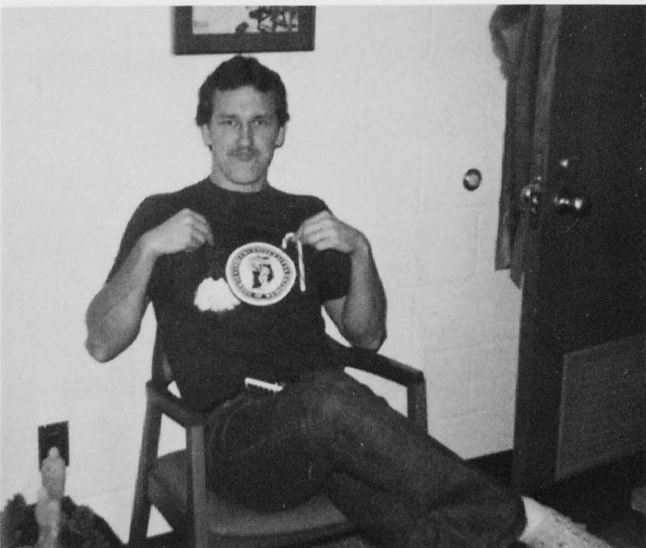

WEST LAFAYETTE

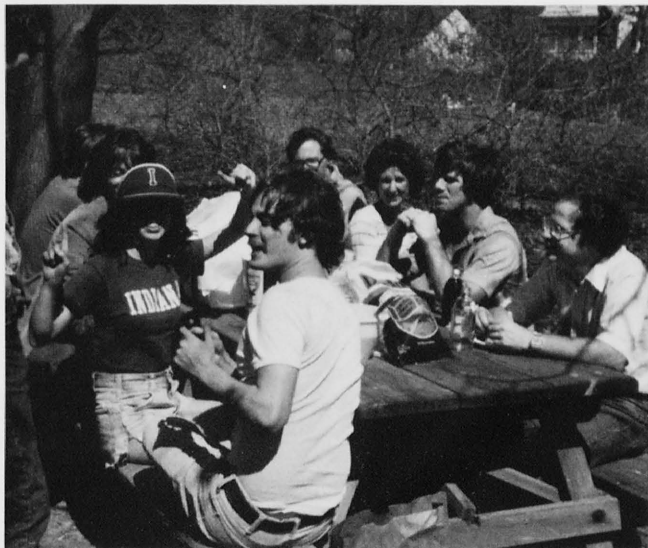

Dog Day Afternoon in the West Lafayette Physio lab.

Purdue Graduate League Champions 1980-1981, and still time for Medical School?

Tony Pechin adds a touch-up to his new I.U.M.C. shirt.

Another lab practical in the park for the West Lafayette crew.

MUNCIE

Pathology specimens turned loose in Muncie.

Moe, Larry, Curly?

A typical exotic evening. Hawaii, Muncie . . . it's all the same . . .

Cutting up in anatomy lab.

TERRE HAUTE

A friendly game of volleyball with the Terre Haute crowd.

Bill Allen performing a pediatric examination of batchild.

Mike Welsh once again preparing for another exam ...

A friendly game of strip poker in physiology lab.

BLOOMINGTON

Craig, John, and Art: The Medical Mexican Mafia.

For Bloomington Alumnus: Note, the fish still have not fallen off!!!

Sticking together: Bloomington Class of '84.

Gathering pearls of wisdom over a few Budweisers.

EVANSVILLE

Make no bones about it, at Evansville, Anatomy was always studied in "high spirits".

Randy Dwenger and George Elmes are a testimony to the fact that some of the best chefs MAY be men.

Dr. Piles (alias Bob DeWeese) enjoys a "breather" during his proctologic exam of the "morbidity obese".

A typical Saturday night, Sunday night, Monday night ... blowing off steam in Evansville.

INDIANA UNIVERSITY

SCHOOL OF MEDICINE

OFFICE OF THE DEAN
Fesler Hall 302
1120 South Drive
Indiana University Medical Center
Indianapolis, Indiana 46223
(317) 264-8157

May 11, 1984

Dear Colleagues:

With the faculty I congratulate you on your achievements. You have developed a background in sciences unknown just a few years ago. You have acquired the skills of a physician - some ancient and some discovered only yesterday. You have learned to observe the affairs of humankind without judging them. You have shown that you can care for patients for whom you provide care. You are now ready to move from spectatorship to accountability.

As you take your next steps, remember that much will be expected of you hereafter. But you will be rewarded by growth and achievement fully commensurate with your effort. The profession you have joined has been richly rewarded through the centuries - and the greatest reward of all is the satisfaction which comes from continued growth and service. To serve as a physician is no right but a fragile public trust which must be earned and re-earned day by day only through trying to improve the lot of individual humans in trouble.

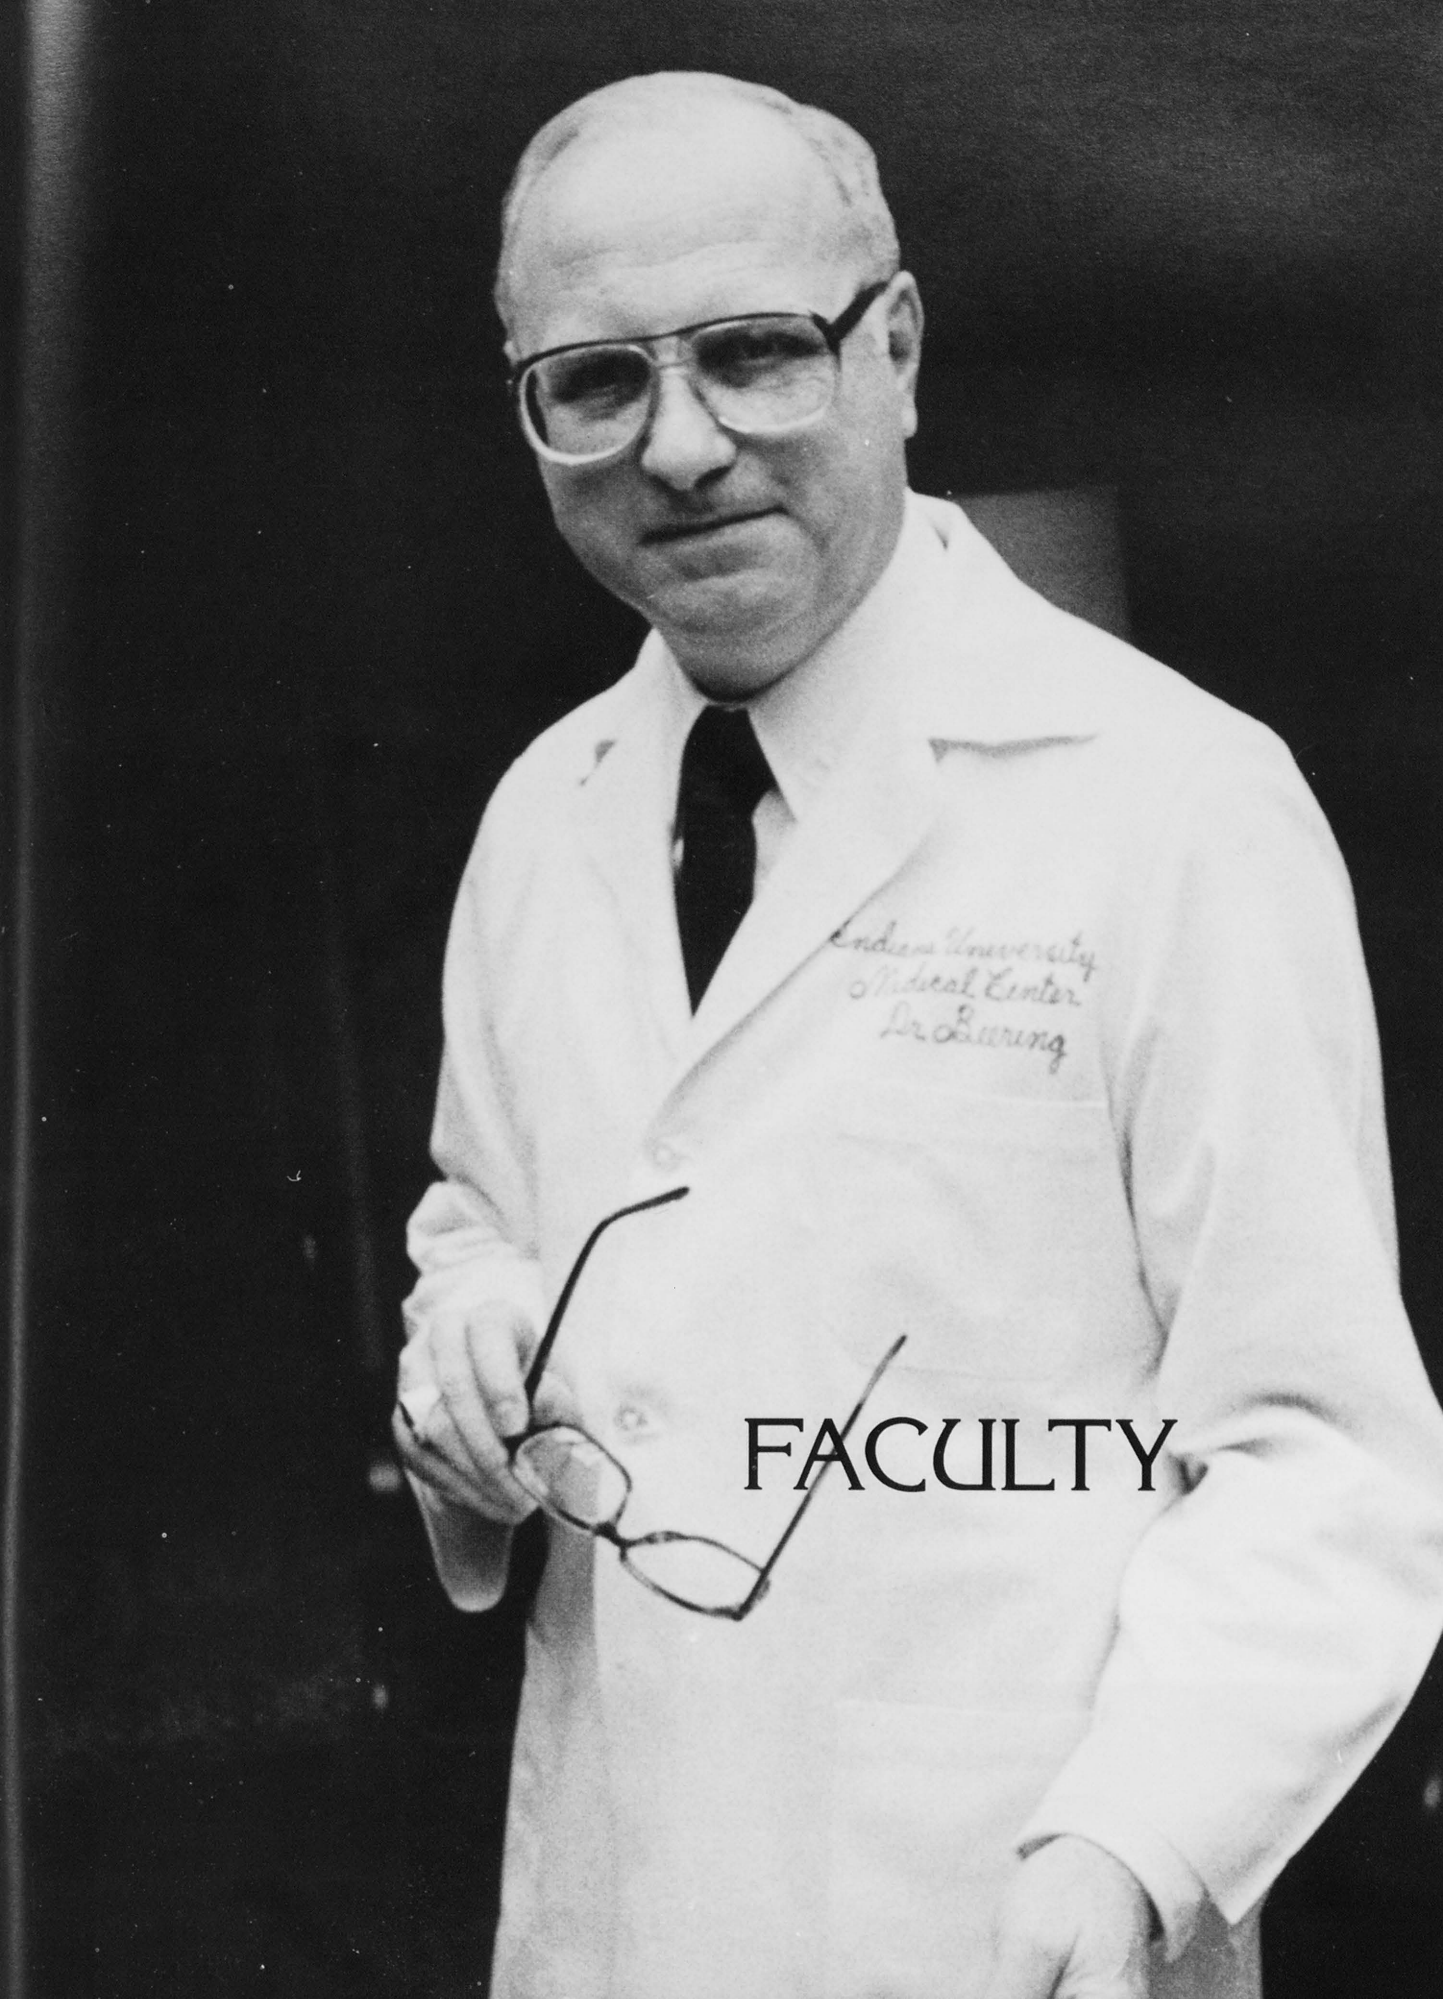

We are happy to add you to the list of those who have gone forth from our School to serve the people - a list now almost 11,000 physicians long.

I wish you joy in your new work.

Sincerely,

Walter J. Daly, M.D.
Dean

Wasn't It Yesterday . . .

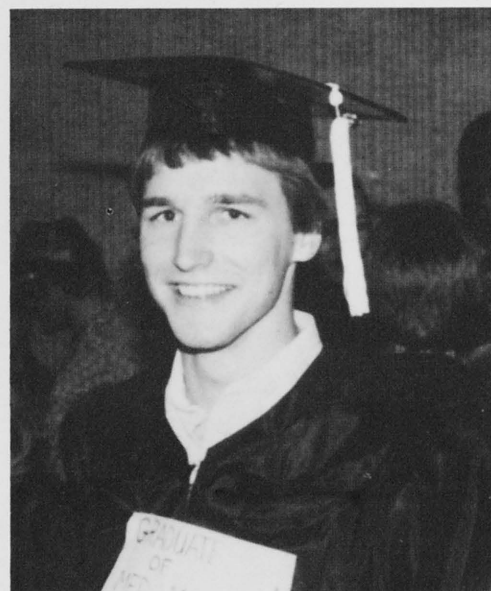

where did all the time go? we're graduating into the "real world", but wasn't it yesterday that we were singing our High School songs and planning for college? wasn't it yesterday that I wasn't worrying about a career, a profession, a family? where did all the time go?

Christen Kerr and Mike Emmerson: The Butler connection.

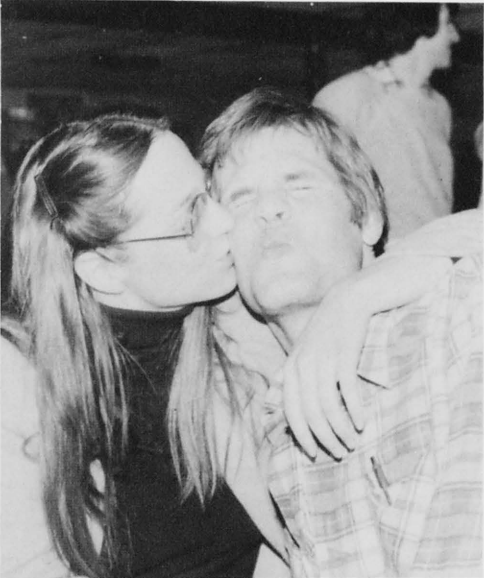

John Flickinger look-alike winner . . .

Andy Combs: A Micro Survivor.

Beth Datena and Duncan Brindley checking for Fetal Heart Tones?

Kathy Verplank caught using a self-defense maneuver on Bill Elliott.

and I think about the past four years and how we all pulled through together because we were working so hard and having so little rewards and feeling like our knowledge was slipping away about the little things . . . when was the last time you read a good book, went to a movie, attended a concert, had money to spend, time to invest? where did all the time go?

Neil Wane and Kathy Miller in preparation to walk their dog.

wasn't it yesterday we were uncovering the cigar boxes in Anatomy lab, picking the ugliest dog in Pharm lab, spending time in the Red Carpet, looking for the last page of class notes, checking the answers to our Biochem "quizes", wondering when we got to wear our white coats . . . where did all the time go?

Brian Douglas punking out.

Cheryl Goings lacing up.

Susie Hagner: Crest Toothpaste Commercial Take 1.

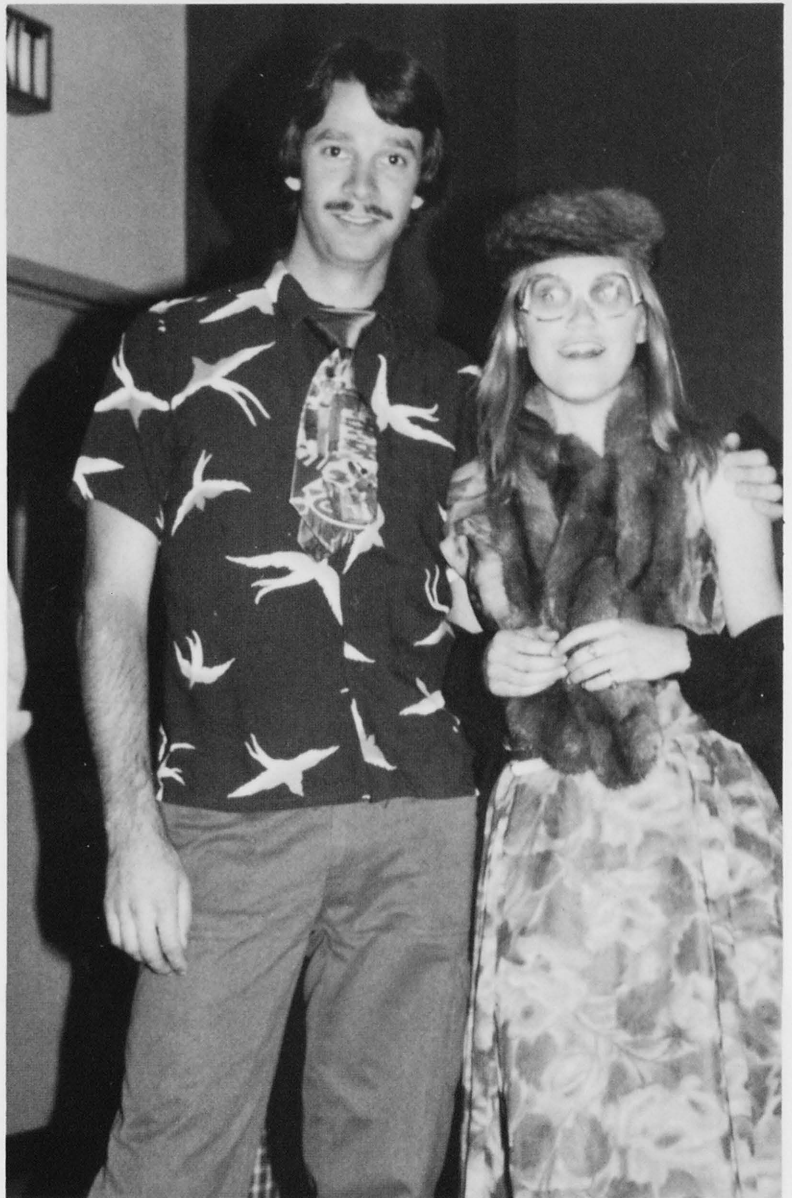

Patti Hicks

Rod Kubley: Another day on Radiology ... tough work!

wasn't it yesterday that we were hanging out in the Wishard cafeteria, sweating out the first chest tub placement, delivering that first warm breath of life called a baby, watching an I.V. blow a vein on up your eyelids, watching the last warm breath of a now lifeless body after a code ... where did all the time go?

Kendall Hansen and Beth Nadorff: and they tell us doctors dress lousy!

wasn't it yesterday we were reading journals trying to prepare for your staffman, getting a thank you from a patient and an "I wish you were a real Doctor already because I'd keep you . . .", and the 4:00 alarm that woke you for Surgery pre-rounds. walking the aisle to Sunshine Hall for a restless sleep, staying up too late the night before call. where did all the time go?

Susan Kemker putting on her happy face.

Don Miller and Jim Nichols jamming at the Red Carpet.

John White: Leader of the Pack.

Bill Allen and Christie Tsolakos taking a dip.

Ryo Choi and Bette Maybury: Mountaineers.

wasn't it yesterday we were doing our first pelvic exam on a Gravida 6 Para 5, 24 yr-old who knew speculum maneuvers better than you, and you intubated for the first time and thought for sure you had killed off a few million brain cells because it took so long, and then there were the sick children and the tears of a family . . . where did all the time go?

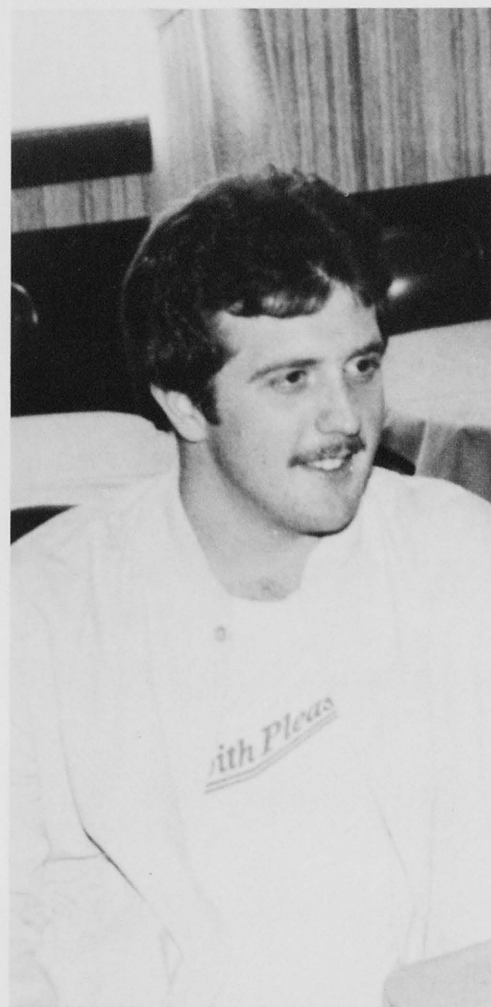

A Good Year for Families. The Foley's . . .

You think about yesterday and now you look forward to graduating and being a real doc, and you see how your friendships have grown, and how you've procured a future in an old profession, and how you've developed some deep relationships ... This is where all the time went ...

Hey Freshmen: Guess what time it is?

Tim Hupfer: A rare form.

Keith Miller

*"To laugh often and love much;
To win the respect of intelligent persons
and the affections of children;*

*To earn the approbation of honest
critics and endure the betrayal of
false friends;*

*To appreciate beauty;
To find the best in others;
To give of ones self;
whether by a healthy child,
a garden patch, or a redeemed
social condition;*

*To have played and laughed with
enthusiasm,
and sung with exultation;*

*To know even one life has breathed
easier
because you have lived —*

This is to have Succeeded!"

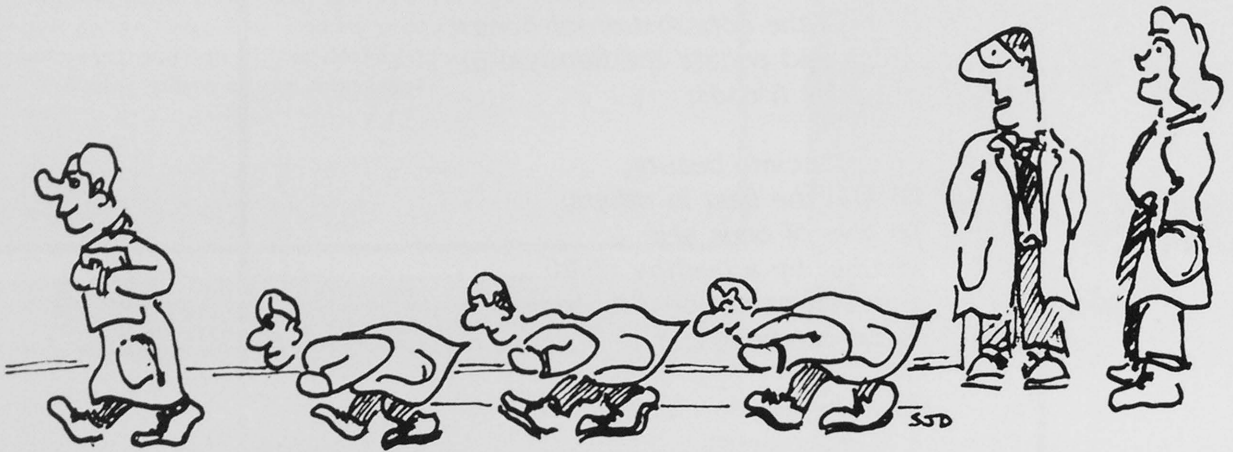

Another Bedtime story for Alan Wise.

Friends 'til the end: Mark Snelling and Kevin O'Brien.

THE LIGHTER SIDE OF . . .

— By Steve Datena

yes, I remember my first physical diagnosis group.

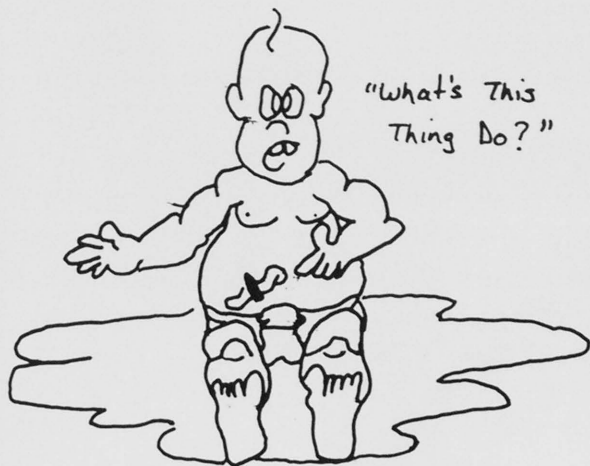

Next time one of the nurses questions one of your orders, come and see me first.

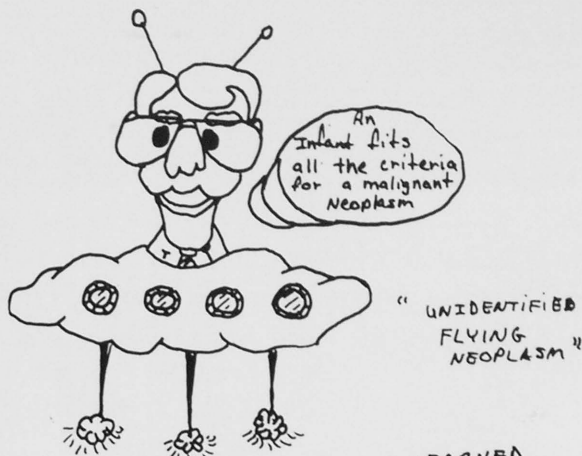

I'll Bet you went to a Regional campus last year

MEDICAL SCHOOL

— By Dave Rheuble

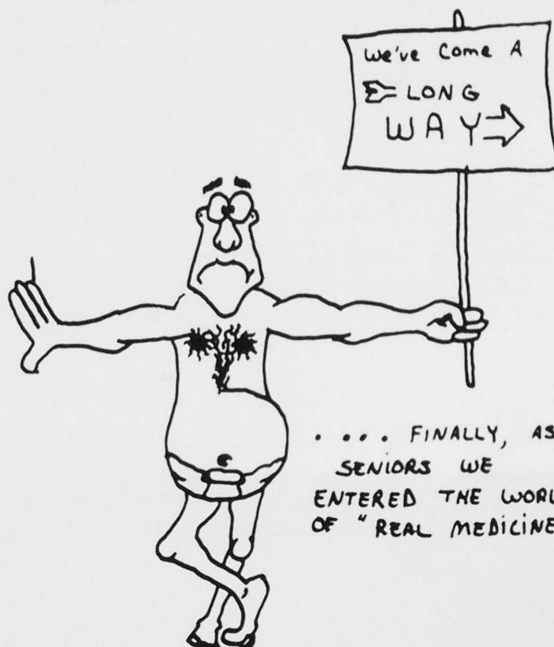

AS FRESHMEN WE WERE
TAUGHT THE INTRICACIES
OF HUMAN ANATOMY.....

AS SOPHOMORES WE LEARNED
THE FUNDAMENTALS OF
PATHOLOGY....

... AS JUNIORS WE LEARNED
AND FINE TUNED NEW AND
EXCITING TECHNICAL SKILLS.....

FROM THE DESKS OF . . . THE NOTEABLE NOTETAKERS

(Chosen from an assortment of the classics)

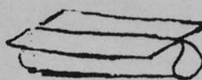

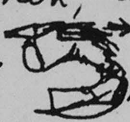

Père Schmedtje offers us hymns with which we, his loyal disciples, may tilt our giltied voices in homage to our diety . . .

— Have faith in your lymph nodes/Come Pathogens that may/Have faith in your lymph nodes/They're working all day — Sing praise to your lymph nodes/they work best that way/By nerve impulses and hormones, 'munogens they alay — The doctor looks wise/The patient has prayed/Lymph nodes do the work/The doctor gets paid (this one will be for the "FOLK MASS" — Brother Brink

1. "you lied doctor, you lied, did you lie?"
2. "it looks like dancing pigs to me"
3. "Nancy's kids sleep around/Burden, burden?"
4. "ITPOYS"
5. "Disemblobulate"
6. "The good doctor"
7. "At this point, Dr. Ritter modestly exhibited his extremely scrawny, knobby knee.
8. "Disco Chest"

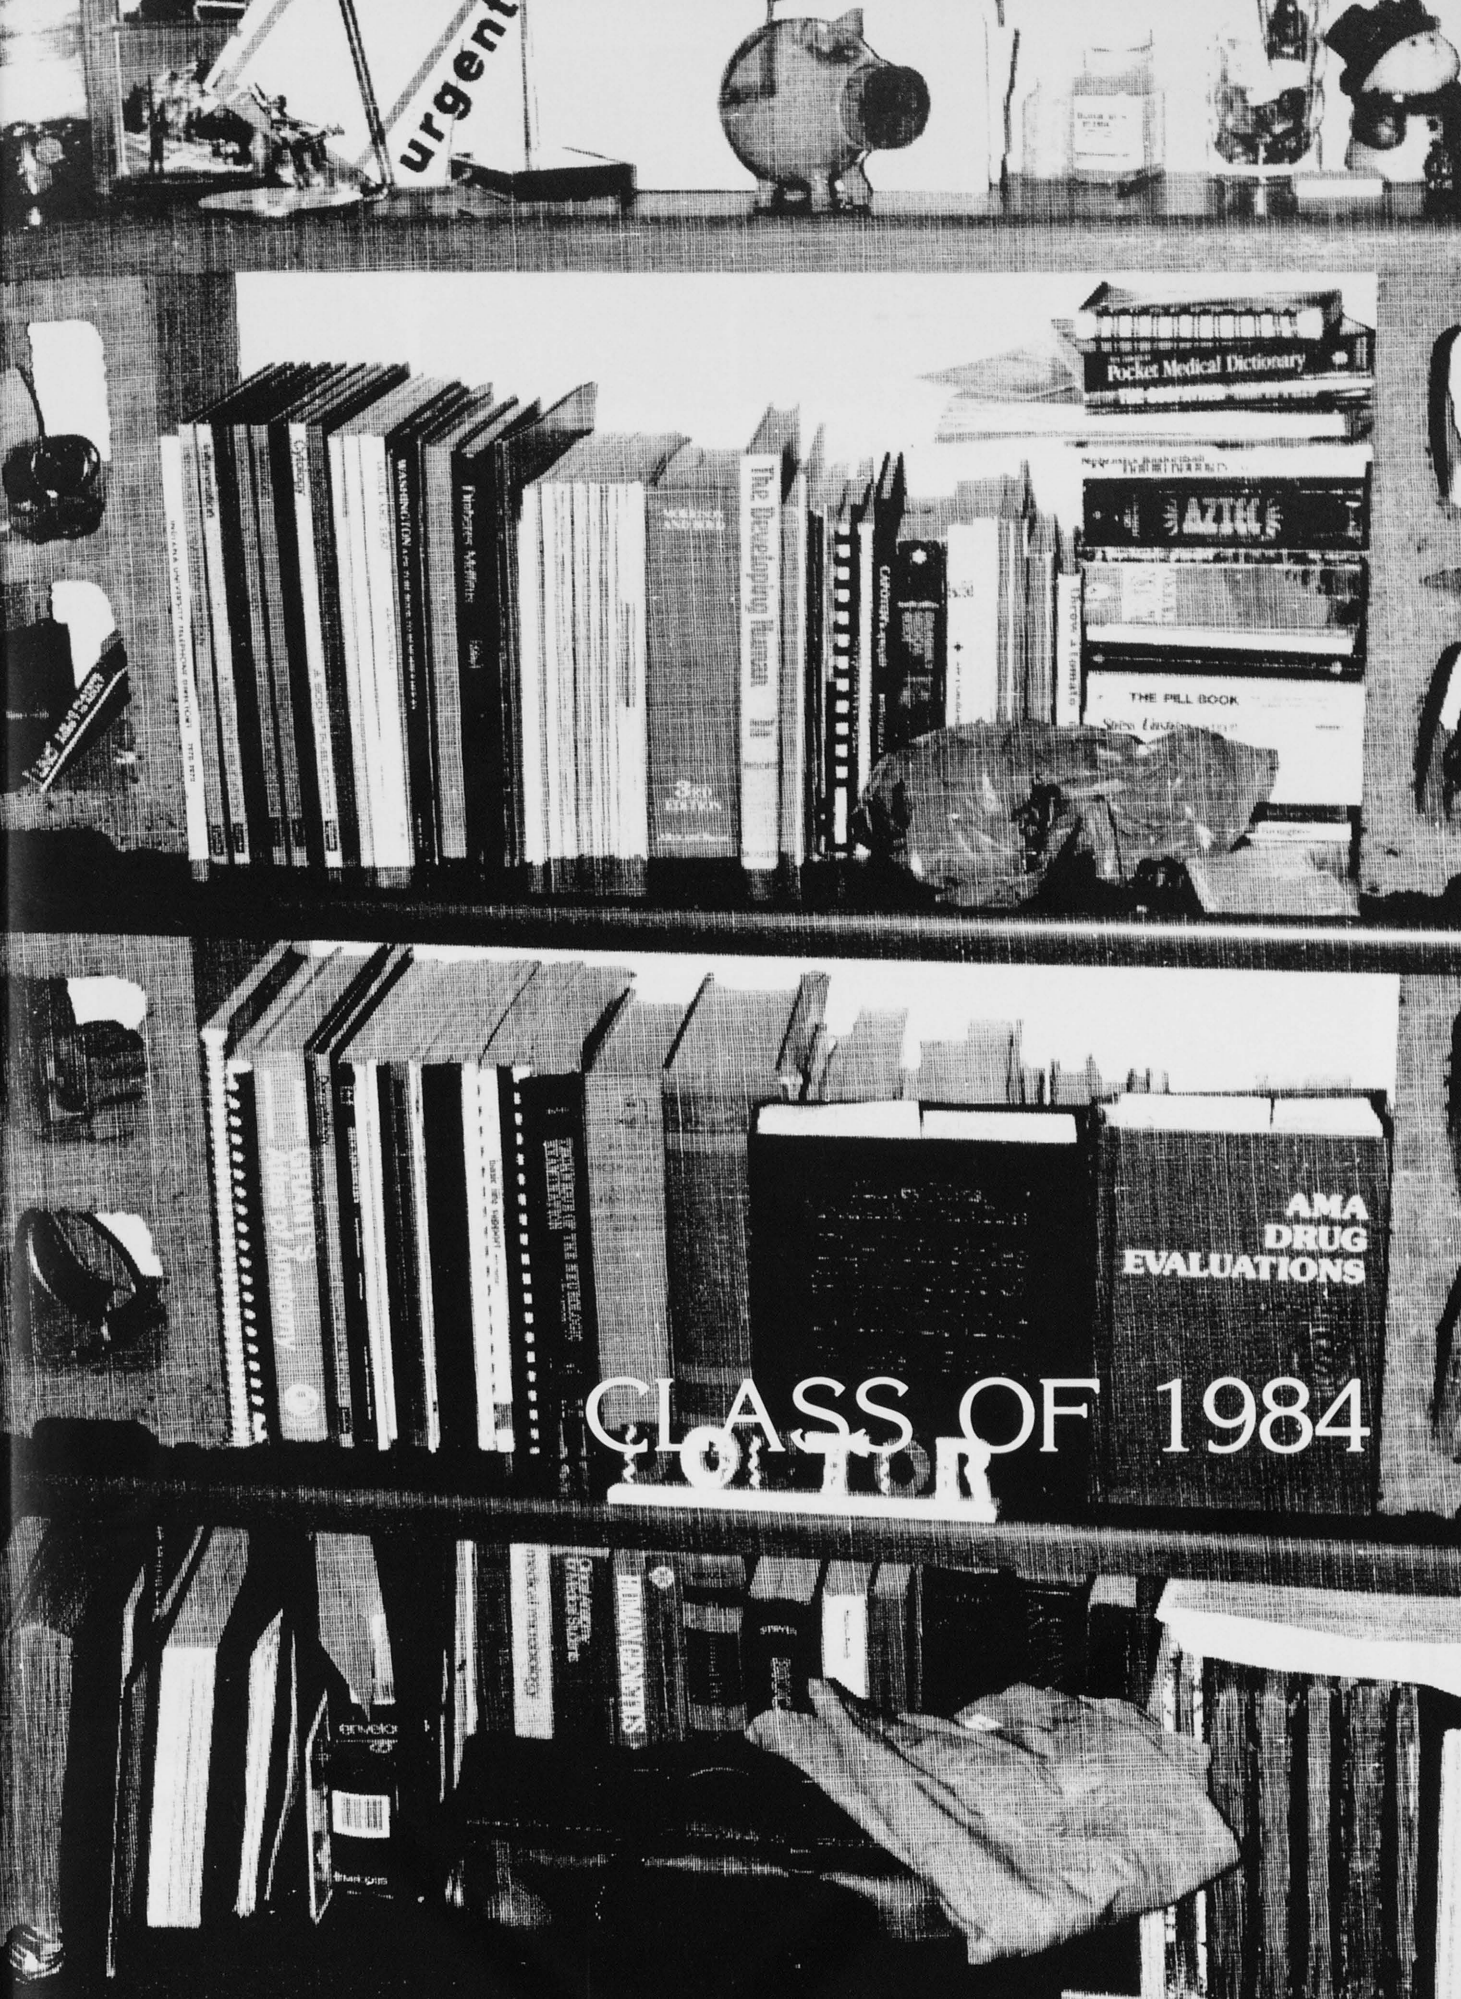

- A. Paul Calkins
- B. Lloyd Lewis
- C. Jim Ransbottom
- D. Mark Snelling
- E. Anne Connolly
- F. Don Miller
- G. Brian Douglas
- H. Patty LeBlanc

Getting maximum usage from these notes:

*To demonstrate how the heart is formed, take these notes
a fold them like this  Then, demonstrate how the
tube folds itself up — do this →  Raise the lower
portion to the superior position. When you end up with
something that looks like  gently place it in one of these —*

The (Official) M.D. Pocketbook

"Look, doctor, somebody finally wrote a book for us"

... The first guide to The Profession. Includes how to dress like a doctor, what to say, and rules to live by.

HIT LIST

1. Good admissions can be hit at long range with an 18 gauge angiocath.
2. Good admissions know their complete PMH in chronological order and can tell it in less than 5 minutes.
3. Good admissions know the names and dosages of all their meds.
4. Good admissions arrive at the hospital before changeover.
5. There is no good admission after midnight.

THINGS CECILS AND HARVEY NEVER TOLD YOU

1. O sign
2. Q sign
3. Tatto sign (stat VDRL)
4. Suitcase sign (ER patients)
5. Veteranoid
6. Wishard unit
7. Tachylordy (lordylordylordy)
8. Bradyordy (ohhhlordydy)
9. Gomertose
10. Hygienic Crisis

DRESSING THE PART

The Junior Student

- ... wears a short dirty white coat. The dirtier the coat, the lower on the hierarchy one is. Lots of betadine impresses Mom when she does the laundry, but blood is definitely declassé.
- ... carries a stethoscope; penlight, pocket ruler, pens and notepads for lab values, all preferably with drug names on them; reflex hammer; safety pins for neuro exams; if on surgery, 4 x 4's, tape in all sizes, and bandage scissors; at least 2-20 gauge angiocaths;
- 2 red-top and 2 purple-top tubes with vacutainer and needles; tourniquet tied through the buttonhole.
- ... wears greens whenever possible.
- ... doesn't shave after a night on call.
- ... carries a clipboard.
- ... has bags under his eyes

The Senior Student

- ... wears the same white coat, only cleaner.
- ... carries only a blue notebook for pearls, pocket ruler, penlight, stethoscope, and EKG calipers. The coat weighs 7 kilos less than the Junior Student's.
- ... doesn't have bags under the eyes

The Intern

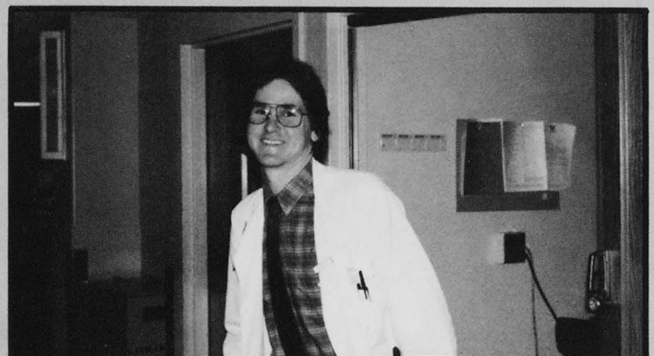

- ... wear a long white coat with the pockets ripped
- ... carries a stethoscope, pocket ruler (penlight was lost last year), calipers, date book, official name tag, and a battered Washington manual.
- ... bags under the eyes
- ... sometimes doesn't shave even when he hasn't been on call.

The Resident

- ... dresses like an intern, but always shaves and doesn't always have bags under the eyes.

The Staff Man

- ... wears an immaculate white coat over either a three-piece suit or a turtleneck.
- ... lost his stethoscope a while back
- ... carries the latest New England Journal from which to strafe the underlings.

THE OATH OF HIPPOCRATES

"I swear by Apollo the physician, by Aesculapius, Hygeia, and Panacea, and I take to witness all the gods, all the goddesses, to keep according to my ability and my judgement the following Oath:

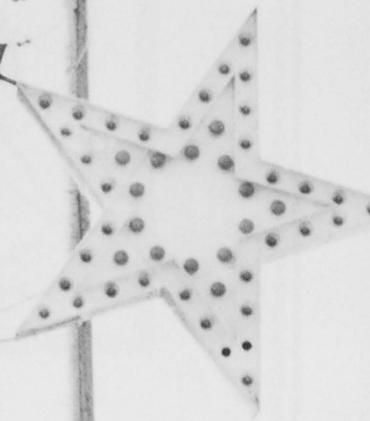

"To consider dear to me as my parents him who taught me this art; to live in common with him and if necessary my own brothers, to teach them this art if they so desire without fee or written promise; to impart to my sons and the sons of the master who taught me and the disciples who have enrolled themselves and have agreed to the rules of the profession, but to these alone, the precepts and the instruction. I will prescribe regimen for the good of my patients according to my ability and my judgement and never do harm to anyone. To please no one will I prescribe a deadly drug, nor give advice which may cause his death. Nor will I give a woman a pessary to procure abortion. But I will persevere the purity of my life and my art. I will not cut for stone, even for patients in whom the disease is manifest; I will leave this operation to be performed by practitioners (specialists in this art). In every house where I come I will enter only for the good of my patients, keeping myself far from all intentional ill-doing and all seduction, and especially from the pleasures of love with women or with men, be they free or slaves. All that may come to my knowledge in the exercise of my profession or outside of my profession or in daily commerce with men, which ought not to be spread abroad, I will keep secret and will never reveal. If I keep this oath faithfully, may I enjoy my life and practice my art, respected by all men and in all times; but if I swerve from it or violate it, may the reverse be my lot."

Is There A Banker In The House?

Our modern world increasingly has required a high degree of specialization.

And with few exceptions, most professionals struggle with the complexities of managing their professional - as well as personal - financial affairs.

As Indiana's largest bank, American Fletcher can provide the services, expertise and experience to help you plan your future on a secure financial basis.

From residency to establishing your practice.

American Fletcher offers a variety of business and personal loans to help finance the enormous costs of a medical career and establishing a practice. We can also help you buy into an already established practice.

And with more and more new technologies and medical equipment becoming available, American Fletcher can provide the financing to help keep your practice on the high standard of professionalism you require.

And well beyond.

As your medical career matures, we can help you plan your family's financial security through our trust services. And the number of outstanding investment services available through American Fletcher may surprise you.

Because American Fletcher is a full-service bank, we can offer a wider array of sophisticated services to meet your financial needs than any other single financial institution.

**HOOK'S
THE ONE!**

for prescriptions

Hook's pharmacists fill over nine million prescriptions a year. That's over 24,000 prescriptions a day, filled one at a time, exactly as the doctor ordered.

But it isn't the nine million prescriptions that's important, it's the nine million opportunities to help. That's important. Hook's. The One for your prescriptions.

HOOK'S THE ONE!™

Imagine Medicine Without a Medical Society

There would be no one

Congratulations Class of 1984

- to speak for you at the legislature
- to represent you before Congress
- to stand up to HHS for you
- to work effectively with governmental programs
- to go to court for you
- to stand firm against NHI
- to fight for you in an insurance crisis
- to represent your views to the media
- to help medically educate the public
- to up-date you on medical news/issues
- to assure quality medical education
- to answer your questions
- to help with problems of third party carriers

... but you.

You and your county, state and national medical societies, together as a team, can do all of the above effectively and in your best interest. Their purpose is to work only for you, the physician, who doesn't usually have sufficient time or knowledge needed to preserve, protect and insure the progress of high-quality, independent practice of medicine in today's complicated and rapidly changing world.

Your medical society team can provide you with a liaison with government, medical-legal consultation, lobbying in your best interests, concerted political action, insurance programs, news media relations, public information/education programs, membership publications to keep you informed, continuing medical education, and many other benefits.

METHODIST HOSPITAL GRADUATE MEDICAL CENTER

Indianapolis, Indiana

As our newest colleagues, we welcome you to the profession of medicine and congratulate you on your recent achievement.

A distinguishing feature of a profession is the ability to work together for the common good of the profession and those they serve. We trust you will wish to be a part of this effort.

The Marion County Medical Society serves as your point of entry to the professional body of medicine. We extend this invitation to you to participate in our future. For membership information, call the Medical Society at 639-3406.

On behalf of your colleagues and teachers, here and nationally, we wish you continued success and offer to work with you in the future.
